

**PRODUCT PERFORMANCE
GUARANTEE™**

Another of Southwire's SIMpull SolutionsSM.

A faster, cleaner, safer way to enhance productivity and lower total installation costs.

Southwire realizes the vital importance of continually providing innovative solutions to job site challenges. The SIMpull TruckTM eliminates various forms of waste such as excess cost, time and labor, improving productivity making contractors more competitive.

With the SIMpull TruckTM, you can expect increased savings on total installation costs, as well as decreased time required at each job site. The SIMpull TruckTM can carry four pay-offs. Contractors have the option of either pulling wire directly from the trailer or moving the entire pay-off to the desired location.

- ✦ Reusable reel pay-off system
- ✦ Requires no loading or unloading
- ✦ Reduces safety risks with loading or unloading
- ✦ Just-in-Time Delivery
- ✦ No reel disposal fee
- ✦ Reel pay-off system can be repositied with a forklift
- ✦ Four, A-62 reels that hold approximately 7,500 pounds each
- ✦ Max reel width & diameter: Width 35.5", Drum 28" and Flange Diameter 60"

SIMpull SOLUTIONSSM

SIMpull SolutionsSM combines everything you need for a faster, easier and safer pull.

SIMpull HEAD™ Pulling Grip

The techniques and precautions for ensuring a quality job are the same for patented SIMpull THHN® cable as they are for old-style THHN. Just follow proper wire handling techniques. You don't have to do anything different—except skip every sloppy, time-wasting step lubing requires.

SIMpull THHN® cable is available in black and colors in sizes 8 AWG through 750 kcmil (appropriate ground sizes also available). You can have it when and where you need it, because it's stocked in all of Southwire's distribution centers—which also offer complete cutting and paralleling of SIMpull THHN® cable.

Combine the SIMpull Truck™ and SIMpull THHN® cable with other SIMpull SolutionsSM and further increase your competitiveness:

- ◆ **Colored Paralleled Reels** increase your efficiency. Reels cut to length and paralleled with color conductors mean no more lifting and leveling of multiple reels and a reduced risk of cross-phasing.
- ◆ **SIMpull Head™ Pulling Grips** eliminate the whole process of making up pulling heads, and they are easy to use. The SIMpull Head™ pulling grips come factory-installed; simply attach to the pulling rope with a clevis. The staggered heads make for much easier passage through 90-degree bends.
- ◆ **Southwire's Ten Regional Service Centers** are fully stocked and within 24 hours of any U.S. job site. When you order your cable from us there won't be any down time.

And, it's all covered under the **Product Performance Guarantee** found at www.southwire.com/guarantee.

Up to 5 conductors paralleled on a single reel
