## Another of Southwire's SIMpull Solutions<sup>SM</sup>

*A faster, cleaner, safer way to enhance productivity and lower total installation costs.*

SIMpull THHN® cable is already proving the value of innovation on job sites across North America. Now multiply your savings by combining these SIM Technology® products with a factory installed, patent pending SIMpull Head™ pulling grip.

Increase productivity, lower your costs and win more jobs by combining an innovative factory-installed pulling head, with Southwire's patented NoLube® SIMpull THHN cable, delivered with either copper or aluminum color conductors, on a single, cut-to-length and paralleled reel. Field tests have shown the combination of products found in SIMpull Solutions<sup>SM</sup> significantly reduces total installation time.

- ✦ Available in sizes 1 AWG - 750 kcmil.
- ✦ Factory installed pulling grip - eliminates the need to make up a pulling head on the job site and reduces waste.
- ✦ Patent pending fail-safe gripping system - conductors guaranteed not to pull loose during your pull.
- ✦ Low profile head - means there's less bulk at the head, making it pull even easier through elbows. Eliminates the problem of the head not fitting in the conduit or around a tight turn.
- ✦ Avoid injury by removing the need to move multiple reels and make up pulling heads.
- ✦ NoLube® SIMpull THHN® cable - means there's no set up, clean up or application of pulling lubricant. Patented SIM Technology® is in the original NoLube® cable.
- ✦ Color Conductors - means safer terminations and less time because there's no phase taping of individual conductors, available in both copper and aluminum. Sequential footage markers are every two feet.
- ✦ Paralleled and cut-to-length reels - parallel up to five conductors on the same reel, handle fewer reels resulting in a quicker set up and less storage space requirements. Reels can be marked with circuit names.

**SIMpull SOLUTIONS<sup>SM</sup>**

**SIMpull Solutions<sup>SM</sup> combines everything you need for a faster, easier and safer pull.**

# Controlling costs on the job is how you keep your business in business.

It's easy to see how SIMpull Solutions<sup>SM</sup> greatly reduces the number of steps involved in a traditional installation.

Typical overhead 250' pull, 4 conductors 500kcmil with 4/0 ground and 4 x 90° bends

One reel of SIMpull THHN® cable with 5 parallel color conductors arrive at job site, unload, transport to pull site, level reels on jacks

- 1452 Total minutes saved
- 24 Man hours
- @ \$75 per hour = \$1815 savings
- Reduces installation time by 86%

## New SIMpull Solutions<sup>SM</sup> Installation requiring 3 men performing various tasks

## Old Traditional Installation requiring 6 men performing various tasks

Eliminates making up the head

Eliminates bulky heads getting stuck in conduit

Eliminates re-working head

Don't just pull. Pull ahead.<sup>SM</sup>
